Proposal: To Make Commercial Website

Purpose

My goal for this project is to get concept of html, css and javascript to create commercial website.

Problem Statement

It is quite difficult to complete the coursework because the whole concept is new for me. To complete the report, I have to use internet, regular meeting with module leader. I will use MS-Word to complete my documentation and concept of html, css and javascript to write a code.

Aims and Objectives

The main objective of this course work is to learn html, css and javascript to make a website implementing the concept of html, css and javascript.

Other aim of this coursework is to increase my skills and knowledge. It will make me more creative and independent to tackle complex problems by my own. Some of my other aims are to understand value of time and its management, to be familiar with concepts of html, css and javascript.

Proposed Approach

The course work is an important and interesting topic which needs lot of research about html, css and javascript from different websites.

Scope of Project

The main scope of this project is to show all the process and concepts of html, css and javascript by making a commercial website. I have to research on different websites and discuss it about how my website is better than others.

Target Audience

The target of this coursework is to gain more knowledge about the topics which I studied in class and implement those concepts to complete the assignment. The assignment includes html code, css concept and javascript to make a website and documentation of whole process.

Hardware and Software Requirements:

- Working Computer/ Laptop.
- MS-Word to complete all my coursework documentation.
- Browsers that supports HTML5.
- Any text editor (notepad/notepad++) to write a code.

Activity Description and Timeline

I have decided to work on research part first to get more concepts of html, css and javascript which will help me to make website. As I have got 5 weeks to complete to this coursework, I would like to finish it early as soon as possible so that I can work on error finding on last week before submission. It will help me to do the best. I will make a website by learning all the concepts and rules of html, css and javascript. Then I will start to write a report.

1. Introduction

1.1. Introduction to HTML

HTML is the standard markup language for creating web pages and web applications with Cascading Style Sheets(CSS) and JavaScript. HTML is a series of tags that tells web browsers how to render, or display a web page. It is a fairly simple language made up of elements which can be applied to pieces of text to give them different meaning in a document, structure a document into logical sections and embed content such as images and videos into a page. It contains information such as the page title, links to CSS and metadata. HTML markup consists of several key components tags and their attributes, character-based data types, character references and entity references. HTML defines several data types for element content, such as script data and stylesheet data. The most common filename extension for files containing HTML is .html. (Hadleyel, 2017)

1.2. Introduction to CSS

CSS is the acronym for Cascading Style Sheets. A CSS file allows you to separate your web sites, HTML content from its style. All of the presentation such as fonts, colors, background, borders, text formatting, link effects & so on are accomplished within a CSS. CSS handles the look and feel part of a web page. CSS can control the color of the text, the style of fonts, the spacing between paragraphs, how columns are sized and laid out, what background images or colors are used, layout designs, variations in display for different devices and screen sizes as well as a variety of other effects. There are 3 types of CSS: External, Internal and Inline. Styles of External style sheet are applied first then internal style sheet override the styles in the first where applicable and inline styles override both external and internal where applicable.
(https://www.tutorialspoint.com/css/what_is_css.htm, 2017)

1.3.Introduction to JAVASCRIPT

JavaScript is an interpreted language that can be included on web pages to make them more interactive. It is case sensitive and object oriented. It is used to check or modify the contents of forms, change images, open new windows and write dynamic page content. Its code runs in browsers only and code are all in text. (Mark "Tarquin" Wilton-Jones, 2011)

1.4.Introduction to Coursework

This project is about learning concepts of html, css and javascript. By learning html, css and javascript I have to make a commercial website by fulfilling the requirements given. The website should be of any organization which I have to choose on my own. My website should contain title, image, table and form. I need css concept to control the color of the text, the style of fonts, the spacing between paragraphs, how columns are sized and laid out, what background images or colors are used, layout designs and as well as a variety of other effects. I also need concept of javascript to check or modify the contents of forms, to make an image slider. I have to make minimum 5 webpages with proper navigation bar. Finally, I have to give comments to the code.

Goals and Objectives

- The main goal of this project is to make proper website by learning html, css, javascript properly.
- By working on this project I will be able to use html, css and javascript properly.
- I will be able to map image properly.
- I can make wireframes properly in future too and I will be able to write a good report which will help me in future.
- Other objective of this coursework is to increase my skills and knowledge.
- It will make me more creative and independent to tackle complex problems by myself.
- I will learn the value of time and can manage it properly.
- I will be familiar with concepts of html, css and javascript.

2. Discussion and Analysis

2.1. How website was designed?

At first when I got questions for this assignment, I thought to make a website on unique topic. As I had interest on Art and Photography, I thought to make a website on Art and Photography. I had to choose any commercial organization to make website so I selected an organization related to Art and Photography. I decided to make website of London Museum of Art & Photography. I was very excited to make website on this topic because it was of my interest.

To fulfill all the requirements, I had to research and look on similar websites as a reference and had to grab some ideas. So, I did research on similar websites and got a bit idea which I can use while making website. I decided the design and started making wireframes for webpages. I created 6 wireframes which means 6 webpages.

After completion of wireframes, the time was to code for website. I started coding with the help of wireframes which I created previously. Simply, I finished the code for 6 webpages. After that I worked on graphic design, I designed logo for my website and some other images for image mapping. I collected many images which I had to set on my website. Some images were set normally and some were used to make slideshow. I used css to control the color of the text, the style of fonts, to set background images and background colors, to set the logo properly and to give styles to my website. I had to use javascript to make automatic image slideshow and to create forms. Finally, I completed all my work on creating website. I did some mistakes also while coding and sometimes the website looked weird because of improper styling on css. But after completion, the website looked so nice and all the requirement were fulfilled. I gave comments on my code. And finally, in this way I designed a website properly. Hope my website will be useful and productive in future.

2.2. Wireframes

2.2.1. Home Page

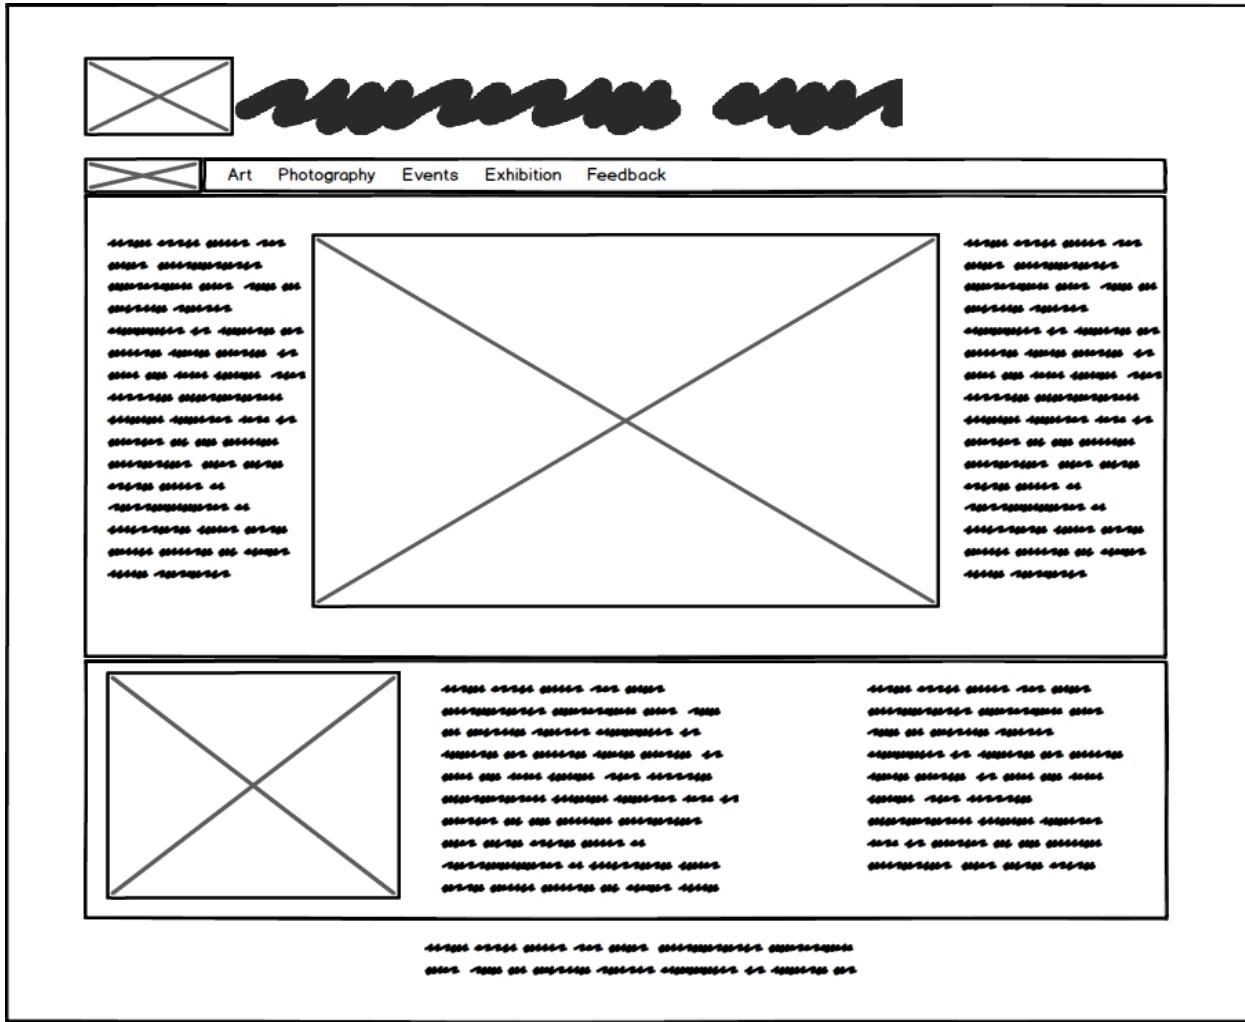

Figure 1: Wireframe of Home Page

This is the rough sketch of Home webpage. The main goal of this wireframe is to create webpages properly and easily. It is like a sketch that how webpage will look after creation. In this wireframe, bold black structure is text of header which consist of log on its left side. The bar at top represents navigation bar. The box having cross sign inside it represents image in webpage and others are text. At bottom, there is section of footer where some text and images are represented. The original webpage contains all these things including Upcoming events and Upcoming Exhibition which is linked to webpage Events and webpage Exhibition.

2.2.2. Art Page

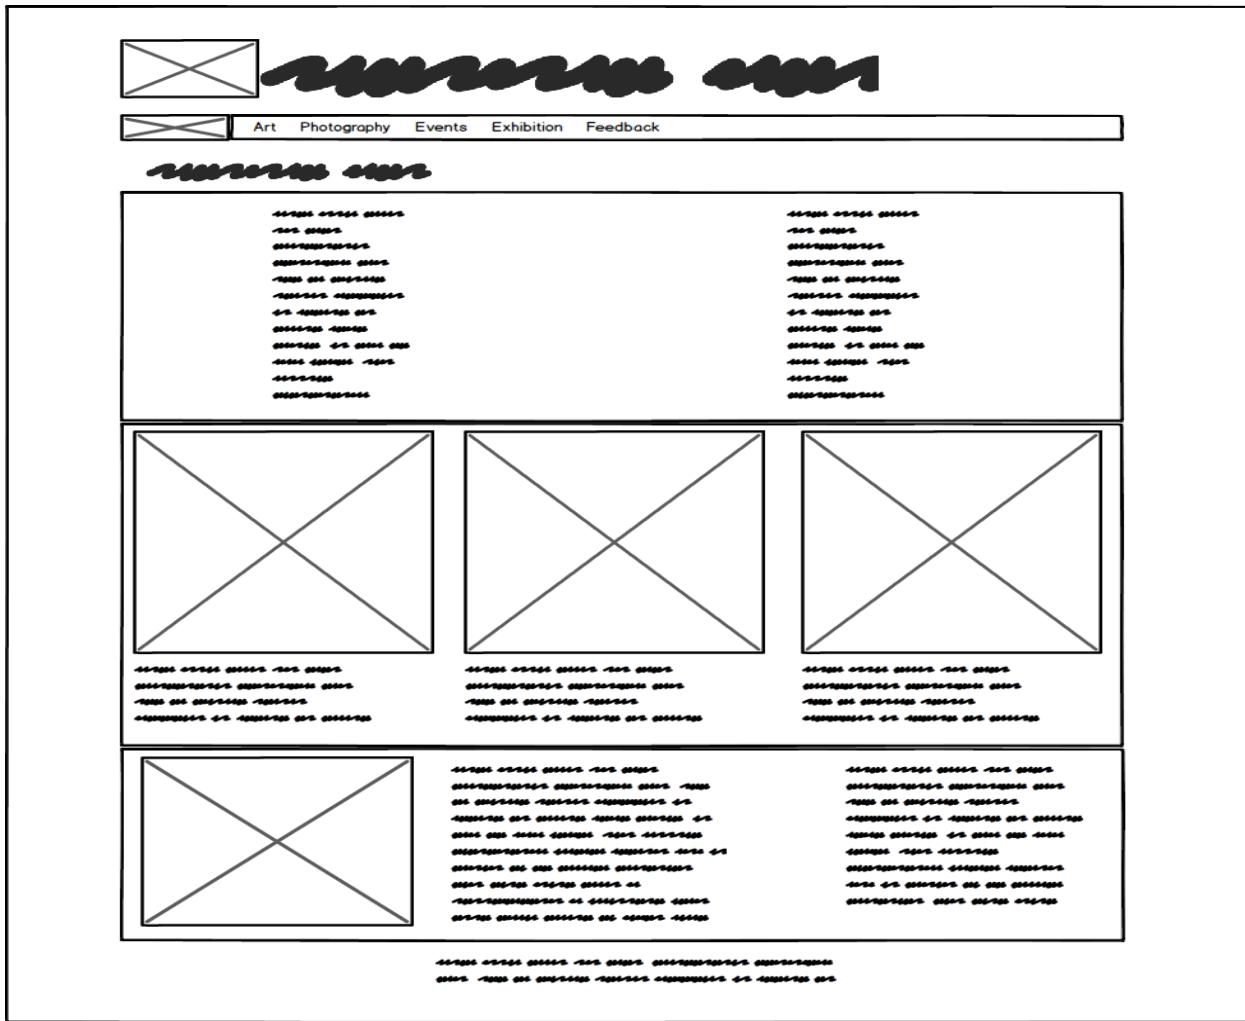

Figure 2: Wireframe of Art Page

This is the rough sketch of Art webpage. The main goal of this wireframe is to create art webpage easily. In this wireframe, bold black structure represents text of header which consist of logo on its left side. The bar at top represents navigation bar. The box having cross sign inside it represents image in webpage and others are text. Below navigation bar, there is header 2. Below header 2 there is a table which contains categories of art. Another table is there which contains many images with its caption. And finally, at a bottom there is footer section where some text and images are represented. The original webpage contains all these things showed on wireframe and is mainly about art and it contains images of art which are on sale on the basis of categories.

2.2.3. Photography Page

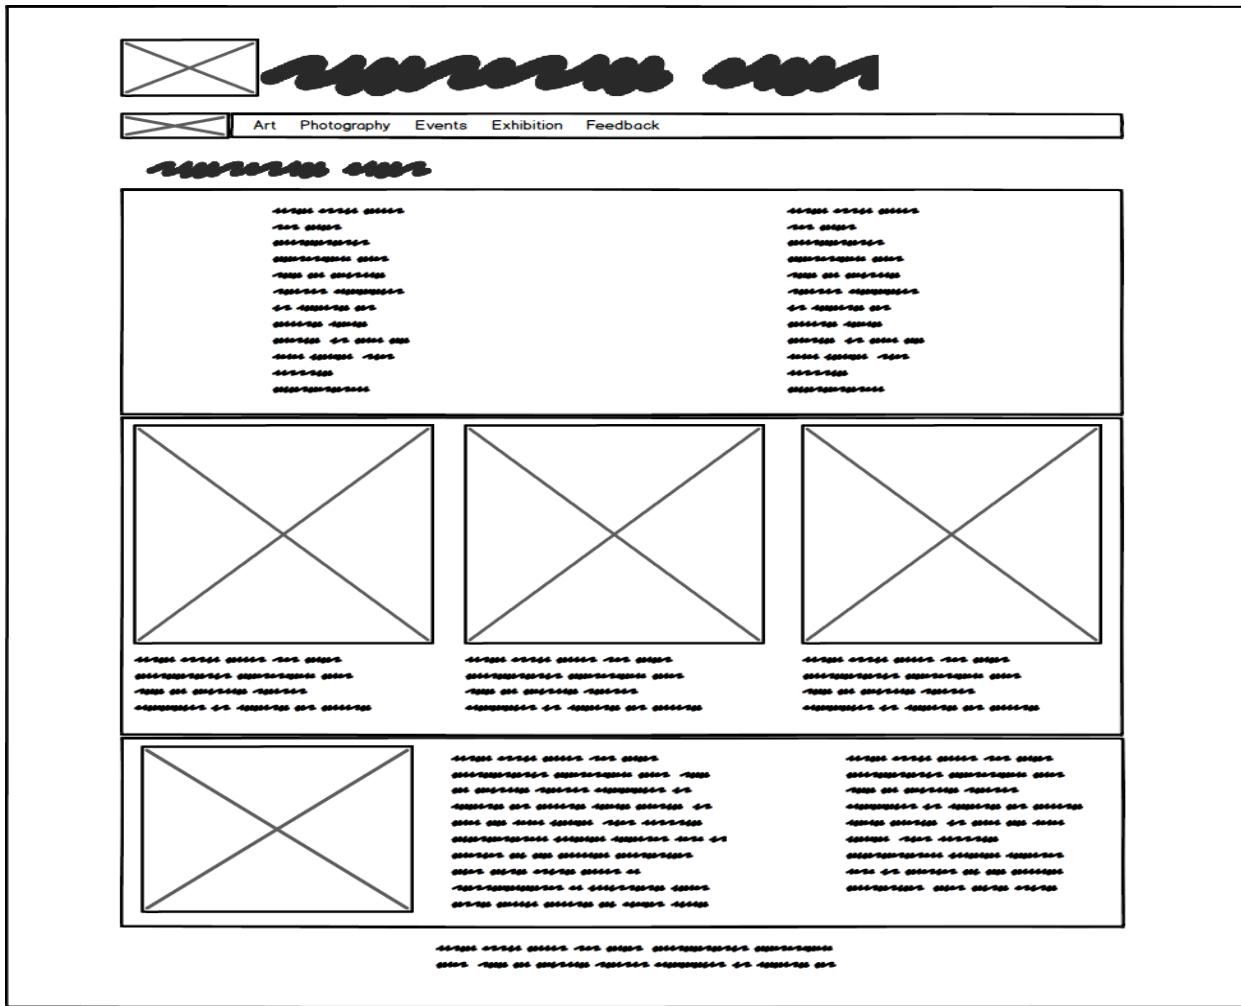

Figure 3: Wireframe of Photography Page

This is the rough sketch of Photography webpage. The main goal of this wireframe is to create photography webpage easily. In this wireframe, bold black structure represents text of header which consist of logo on its left side. The bar at top represents navigation bar. The box having cross sign inside it represents image in webpage and others are text. Below navigation bar, there is header 2. Below header 2 there is a table which contains categories of art. Another table is there which contains many images with its caption. And finally, at bottom there is footer section where some text and images are represented. The original webpage contains all these things showed on wireframe and is mainly about photography and it contains professional photographs which are on sale on the basis of categories.

2.2.4. Events Page

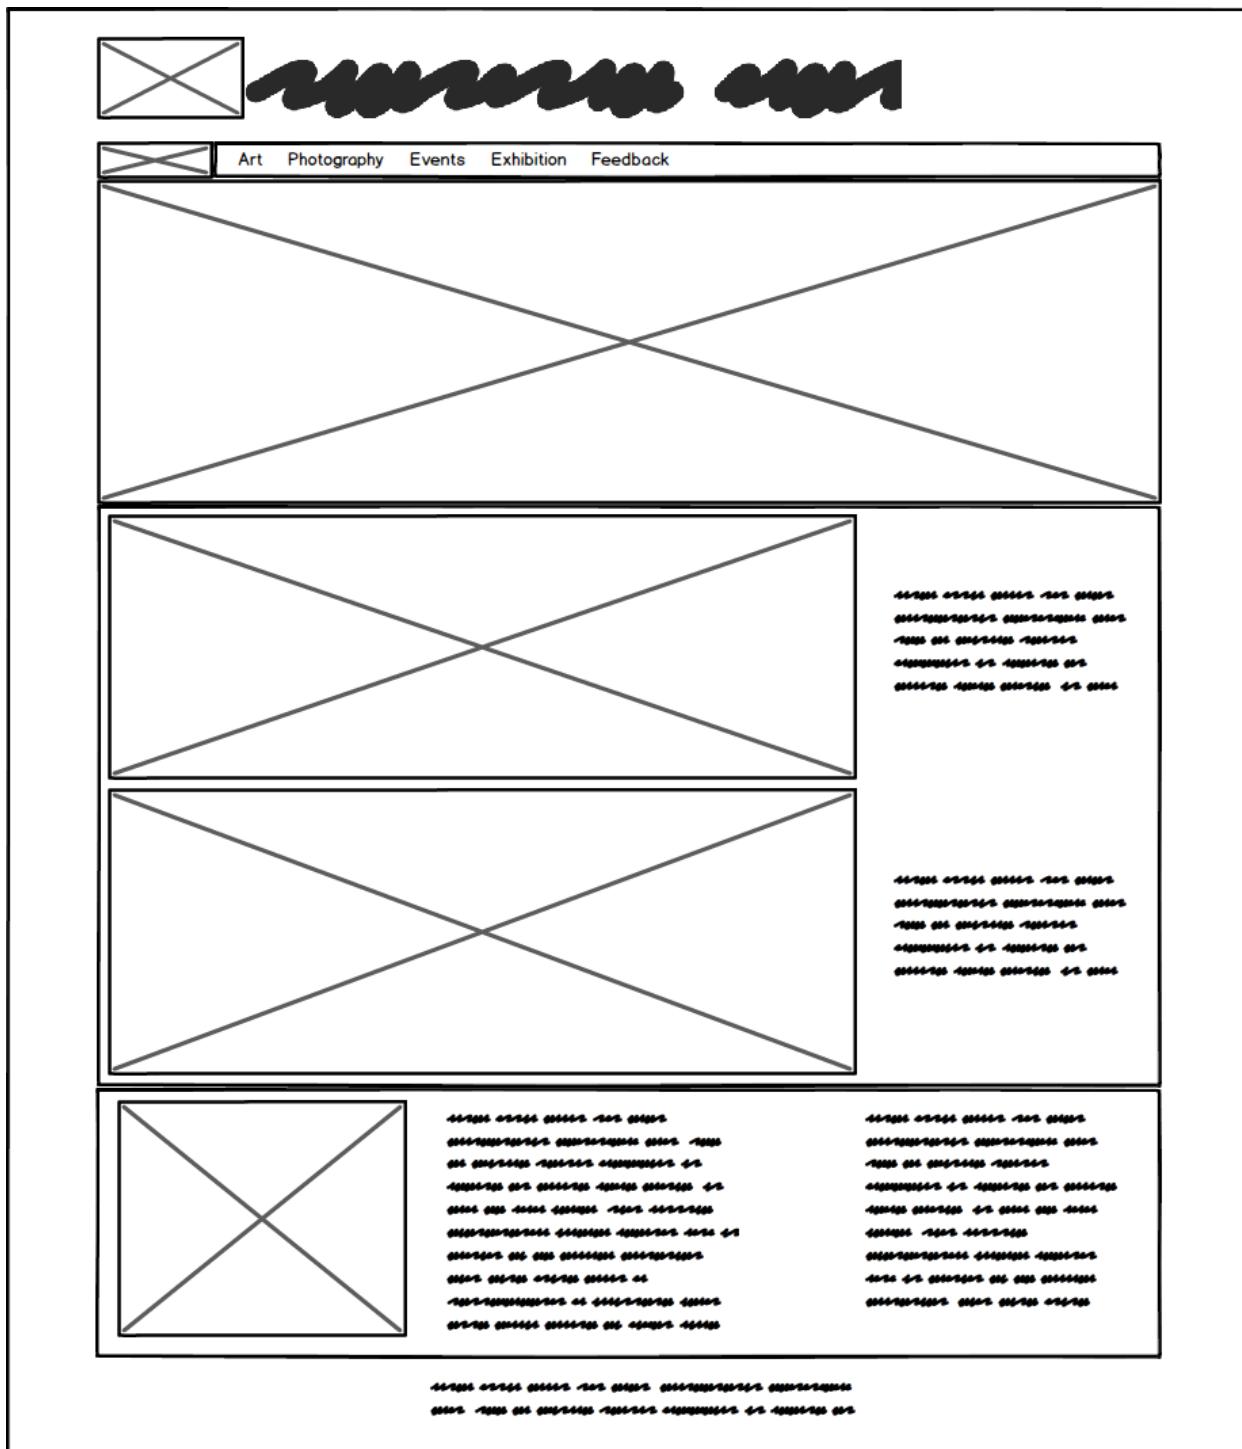

Figure 4: Wireframe of Events Page

This is the rough sketch of Events webpage. The main goal of this wireframe is to create Events webpage easily. In this wireframe, bold black structure represents text of header which consist of logo on its left side. The bar at top represents navigation bar. The box having cross sign inside it represents image in webpage and others are text. Below navigation bar, there is image slider which shows images of events. Below the slider, there is a table which contains details of upcoming events with images. And finally, at bottom there is footer section where some text and images are represented. The original webpage contains all these things showed on wireframe and mainly gives the details of upcoming events.

2.2.5. Exhibition Page

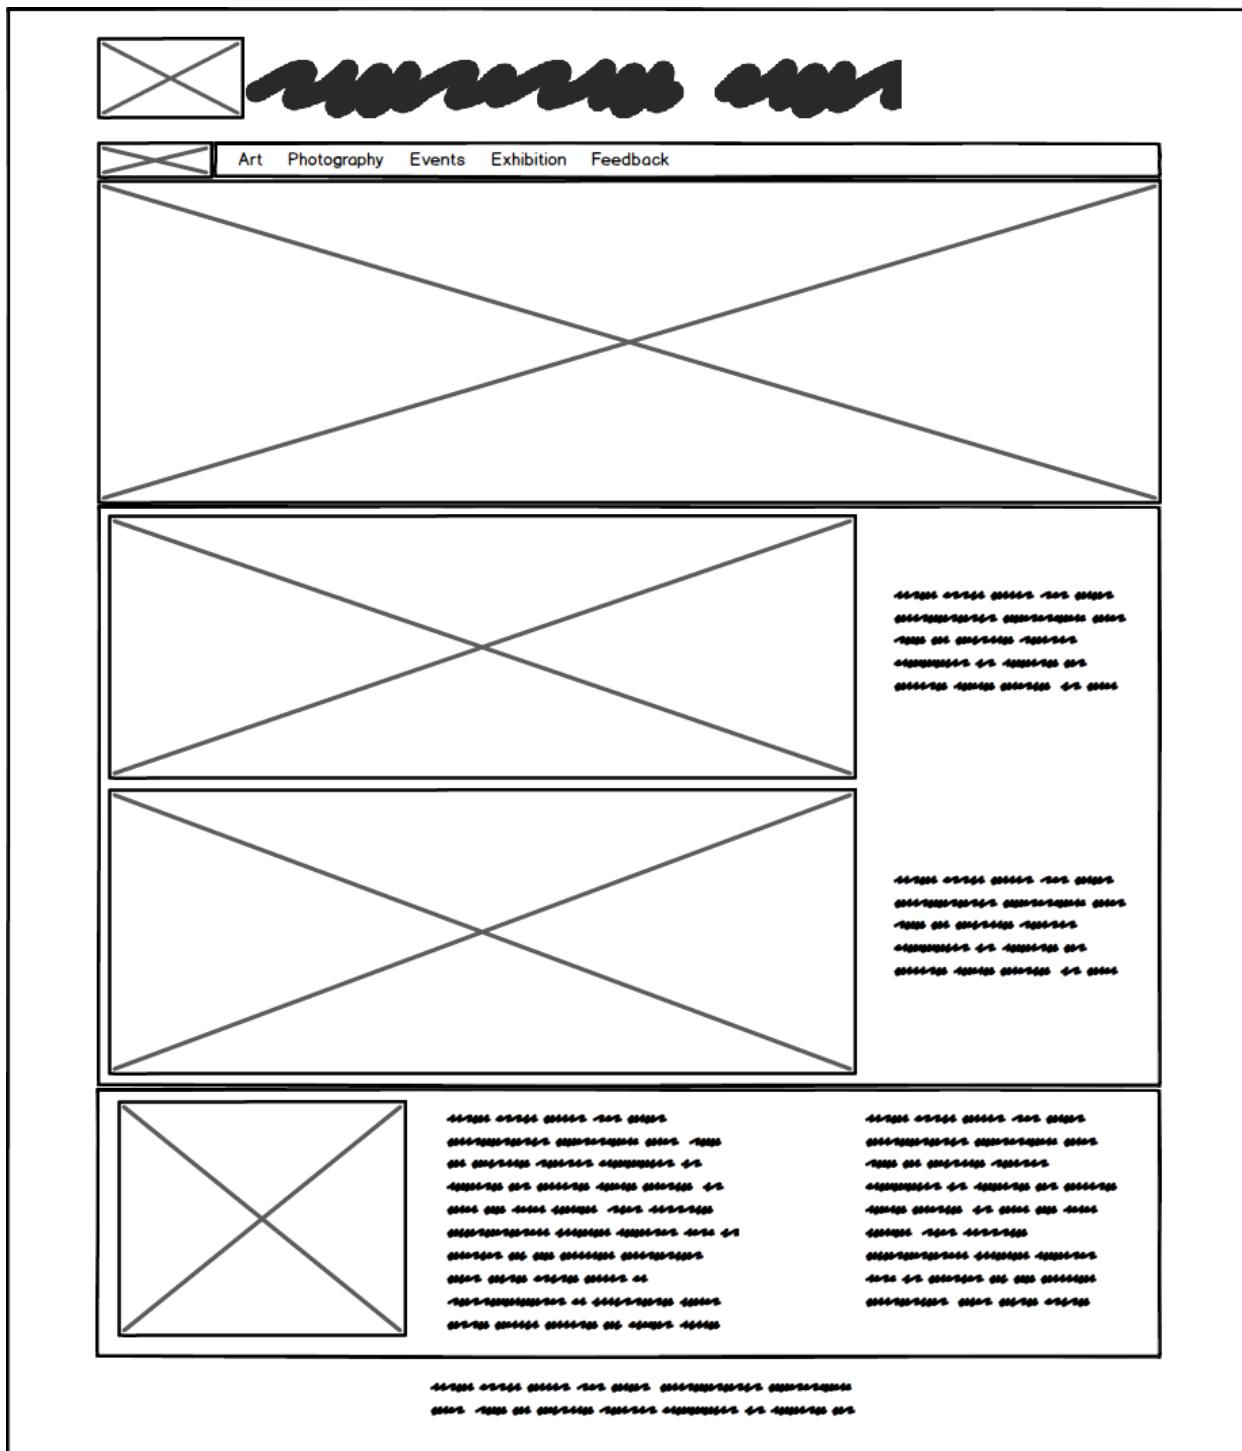

Figure 5: Wireframe of Exhibition Page

This is the rough sketch of Exhibition webpage. The main goal of this wireframe is to create Exhibition webpage easily. In this wireframe, bold black structure represents text of header which consist of logo on its left side. The bar at top represents navigation bar. The box having cross sign inside it represents image in webpage and others are text. Below navigation bar, there is image slider which shows images of exhibitions. Below the slider, there is a table which contains details of upcoming exhibitions with images. And finally, at bottom there is footer section where some text and images are represented. The original webpage contains all these things showed on wireframe and mainly gives the details of upcoming exhibitions.

2.2.6. Feedback Page

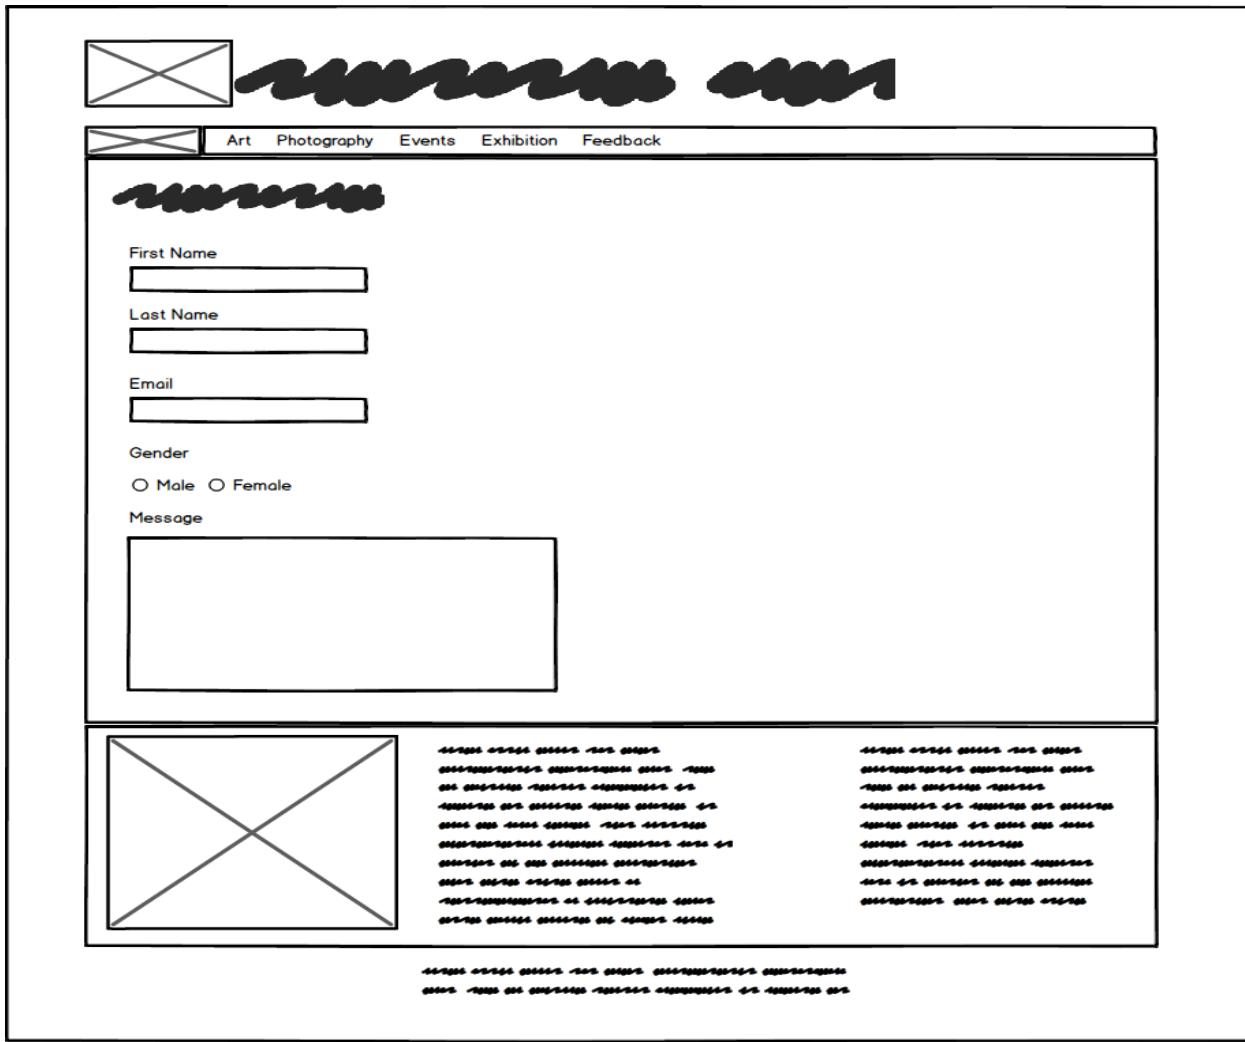

Figure 6: Wireframe of Feedback Page

This is the rough sketch of Feedback webpage. The main goal of this wireframe is to create Feedback webpage easily. In this wireframe, bold black structure represents text of header which consist of logo on its left side. The bar at top represents navigation bar. The box having cross sign inside it represents image in webpage and others are text. Below navigation bar, there another heading. The form represented below header is feedback form for user which uses javascript concept to show pop-up alert window. And finally, at bottom there is footer section where some text and images are represented. The original webpage contains all these things showed on wireframe and mainly gives the details of upcoming exhibitions.

2.3.Tools used while developing the site

- 2.3.1. **Notepad++** - It is a free source code editor. It supports tabbed editing, which allows working with multiple open files in a single window. I used Notepad++ to write a html, css and javascript code.
- 2.3.2. **Chrome** – Chrome is a freeware web browser developed by Google. I used this browser to check and view my code as website and also to find error if any are there.
- 2.3.3. **Balsamiq Mockups 3** – It is graphical user interface mockup and website wireframe builder application. It allows the designer to arrange pre-built widgets using a drag and drop editor. I used this tool to create wireframe of webpages.

Figure 8: Website of Art.com

URL: <http://www.art.com/shop/artists/>

Comparison

This website is completely different from my website, as it does not contain events, exhibitions and feedback sections. The homepage should have managed in better way than it present. The color combination is similar and not matching with contents. It should have shown some more photos as a slideshow as shown in my website. My website contains different pages for art and photography but this website has same page for both art and photographs.

Pros	Cons
This website offers the best sellers and gives discount to product users. It has artist section which gives artist an opportunity to explore themselves to the world. It has important sections on navigation bar, which is good point of this website. It offers users to buy paintings and other prints with suitable discounts.	The negative point of this website is that it does not contain feedback form for users. This website has not used any interesting materials on its home page which would have increased the interest of user to visit the site. The title and contents are not matching. It contains other topics inside the page which are not related to the title.

Table 1: Pros and Cons of Art.Com Website

3.1.2. Website of Asian Museum

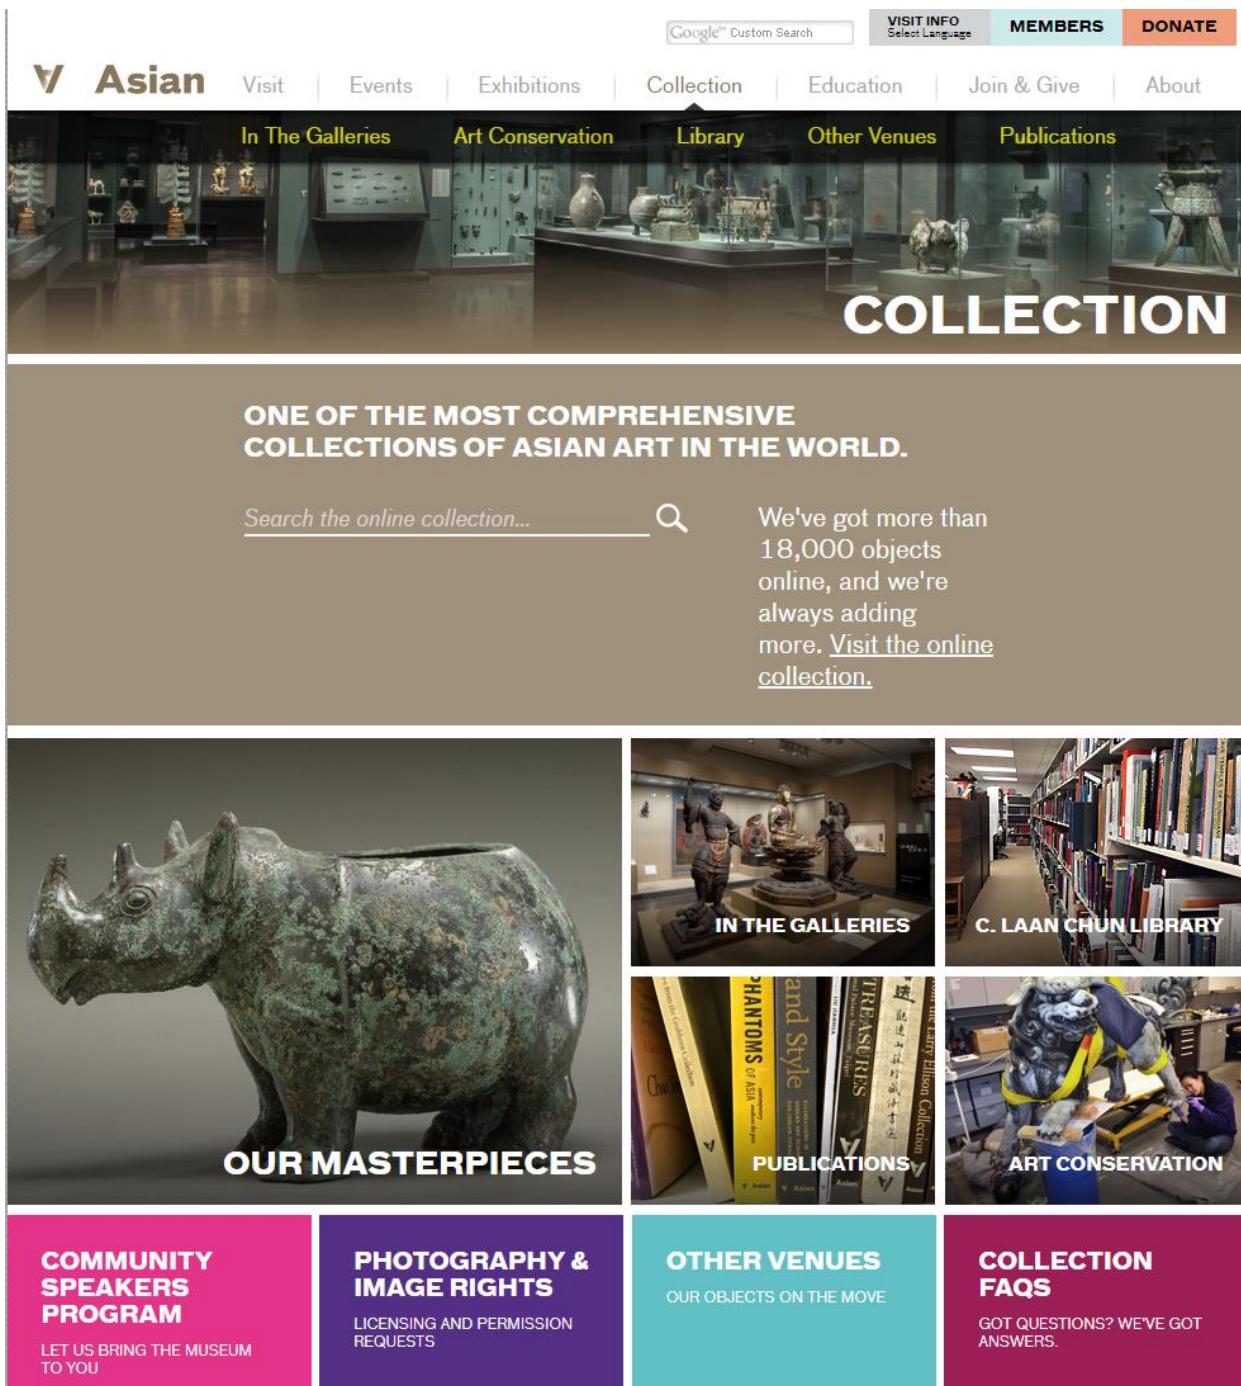

Figure 9: Website of Asian Museum

URL: http://www.asianart.org/?gclid=CjwKCAjwk4yMBRAgEiwA4ftLs4xv_EhYyKuwJyJg94AeMBZ7-COsGKEBl22dMul67h9pqCS9SiLlcRoC7-MQAvD_BwE

Comparison

This website contains many pages and many sections which makes user confuse about the topics and pages. As compared to my website, my website has specific pages for specific topics which are very clearly shown and are not confusing for users. The color combination and navigation bar is different from my website.

Pros	Cons
This website has many good points such as Donate button on its home page from where users can donate money to the museum for children. Education section which helps the user to learn something about that museum. It has employment and membership section which gives opportunity to become members for users.	The white background and navigation bar is not matching as it should have used dark colors instead. It does not contain feedback form for users to give any type of feedback to the website.

Table 2: Pros and Cons of Asian Museum Website

3.1.3. Website of Museum of Contemporary Photography

Figure 10: Website of Museum of Contemporary Photography

URL: <http://www.mocp.org/>

Comparison

This website is totally different from my website. It has dark color combinations in every page where as my website has light and soft colors. The sign ins, location are kept on top right side on this website but in my website they are on the bottom.

Pros	Cons
This website has events and exhibitions sections which let the people know about what events and exhibitions of museum are coming up on which date and time. Background color, styles, design and contents are matching perfectly. Navigation bar is managed properly and clearly to make user friendly.	As it is a website of museum, it has another website of college inside it which is not working good and does not seems related. It has not offered a form to give feedback. Every page has less contents as it has many sections on navigation bar. It has less products for sale on its shop section.

Table 3: Pros and Cons of Museum of Contemporary Photography Website

3.1.4. Website of International Center of Photography

The screenshot shows the homepage of the International Center of Photography (ICP) website. At the top, there is a navigation bar with links for SUBSCRIBE, SUPPORT ICP, BECOME A MEMBER, ALUMNI, and LOGIN, along with a search icon. Below the navigation bar is the ICP logo and the text "INTERNATIONAL CENTER OF PHOTOGRAPHY". To the right of the logo are links for BROWSE, EXHIBITIONS, SCHOOL, EVENTS, ABOUT, SHOP, and a magnifying glass icon for search. The main banner features a colorful photograph of autumn leaves. Overlaid on the banner is a promotional message: "SAVE 15% ON FALL CONTINUING EDUCATION CLASSES" in white text, followed by "GET DETAILS" in green text. In the bottom left corner of the banner, the word "SCHOOL" is visible. Below the banner, a text box states: "The International Center of Photography (ICP) is the world's leading institution dedicated to photography and visual culture." The page is divided into several sections: "EXHIBITIONS" featuring a photo of two people holding a "SO LONG BOBBY" sign; "EVENTS" featuring a photo of a man with a beard; "COLLECTIONS" featuring a photo of a police dog and its handler; and a quote from Cornell Capa. The quote reads: "Photography is demonstrably the most contemporary of art forms. It is the most vital, effective, and universal means of communication of facts and ideas between peoples and nations." The quote is attributed to "Cornell Capa" and "Photographer and ICP Founder". Below the quote is a signature that appears to read "Wm. Lee". The "COLLECTIONS" section also includes a photo of a hand holding a small portrait. The "Contemporary Acquisitions" section is partially visible on the right.

Figure 11: Website of International Center of Photography

URL: <https://www.icp.org/>

Comparison

This website has many contents on its home page. Navigation bar is on top right side and heading of website is on top left side. As compared to my website this website does not have image slider on its home page, no any information about upcoming events and exhibition which should have been described on home page for better view. My website has light colors whereas this website has only white color as a background.

Pros	Cons
This website has School page which offers photography education for every level from courses and workshops to certificate and master's degree. It contains information and facilities about the photography center which let the people know everything about the company. It also has events, exhibition, membership, donation section.	It has all the sections present on home page which all are also presented on navigation bar. Its making home page congested and long for not a good reason. It does not have feedback form to give feedback about website and company.

Table 4: Pros and Cons of International Center of Photography Website

3.1.5. Website of Jackson Fine Art

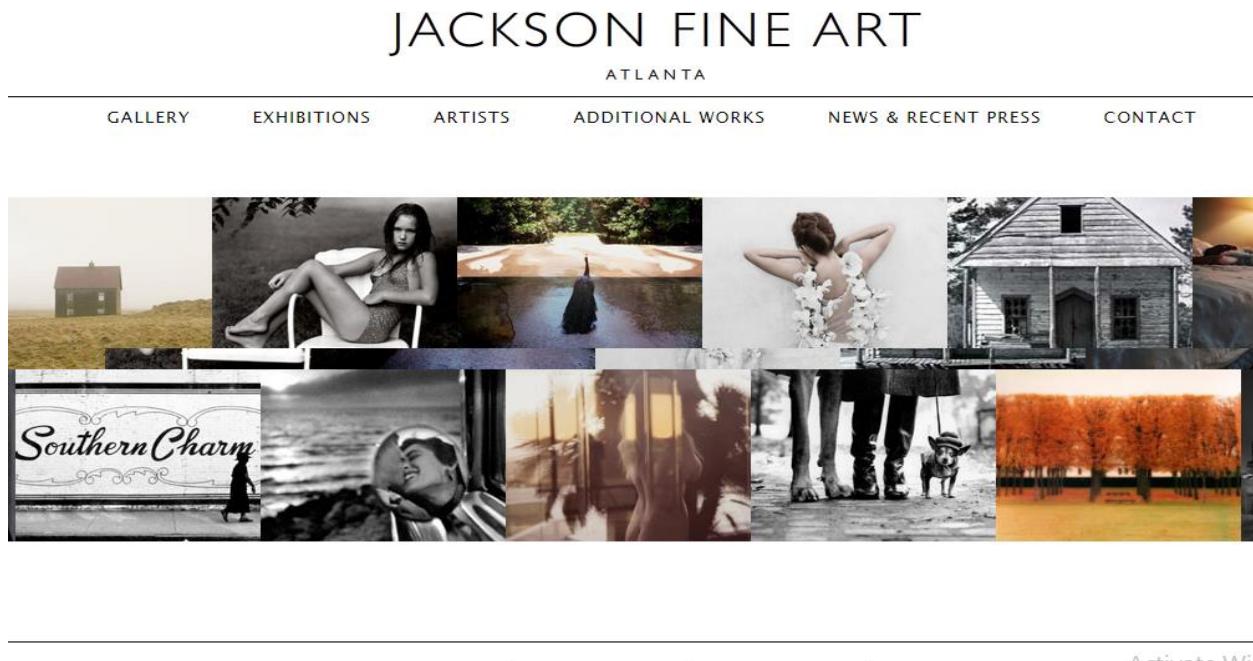

Figure 12: Website of Jackson Fine Art

URL: <http://www.jacksonfineart.com/>

Comparison

As compared to my website, this website only has image slideshow on its home page. It has white color on its background, font colors are black and styles are simple. This website is so simple as compared to my website. My website contains more contents than this website. The color used for hover is orange.

Pros	Cons
<p>It has all the important sections which are needed for a user friendly website. Its home page is creatively nice. It has artist section which let the people know about artist. It has news section which offers the news of events and exhibition held on company.</p>	<p>It only has image slider on its homepage and does not have other important contents. It has only less contents and information on every pages. This website does not seem to be user friendly. It has very less components</p>

Table 5: Pros and Cons of Jackson Fine Art Website

3.2.Dissimilar Websites

3.2.1. Website of Guitar Store

The screenshot shows the homepage of [The Guitar Store](https://www.theguitarstore.com.my/). The top navigation bar includes links for My Account, Checkout, Track Your Parcel, RM Currency, and a shopping cart icon. The main menu features categories like Home, BRANDS, SALE, OUR LOCATIONS, SUPPORT, and CONTACT US, along with a search bar.

A sidebar on the left lists categories such as GUITARS, RECORDING & COMPUTER AUDIO, BASS, EFFECTS, AMPLIFICATION, DRUMS & PERCUSSION, UKULELE, PIANO & KEYBOARDS, and ACCESSORIES. The main content area features a "GRAND CLEARANCE SALE" banner with a 30% OFF discount on various items like guitars, effects, and amplifiers. Below this, there are sections for LATEST, SPECIAL, and BESTSELLER products, each displaying a different guitar-related item. At the bottom, there's a social media sidebar for The Guitar Store's Facebook page, which has over 20k likes.

Figure 13: Website of Guitar Store

URL: <https://www.theguitarstore.com.my/>

Pros	Cons
The presentation and designs of this website is perfect. It offers brand of guitars and discount for users. Many types of guitars are on sale with discount on home page.	Only the home page is available. If other pages are clicked it says The page you requested cannot be found. Only the home page is working, others are not available.

Table 6: Pros and Cons of Guitar Store Website

3.2.2. Website of Vespa

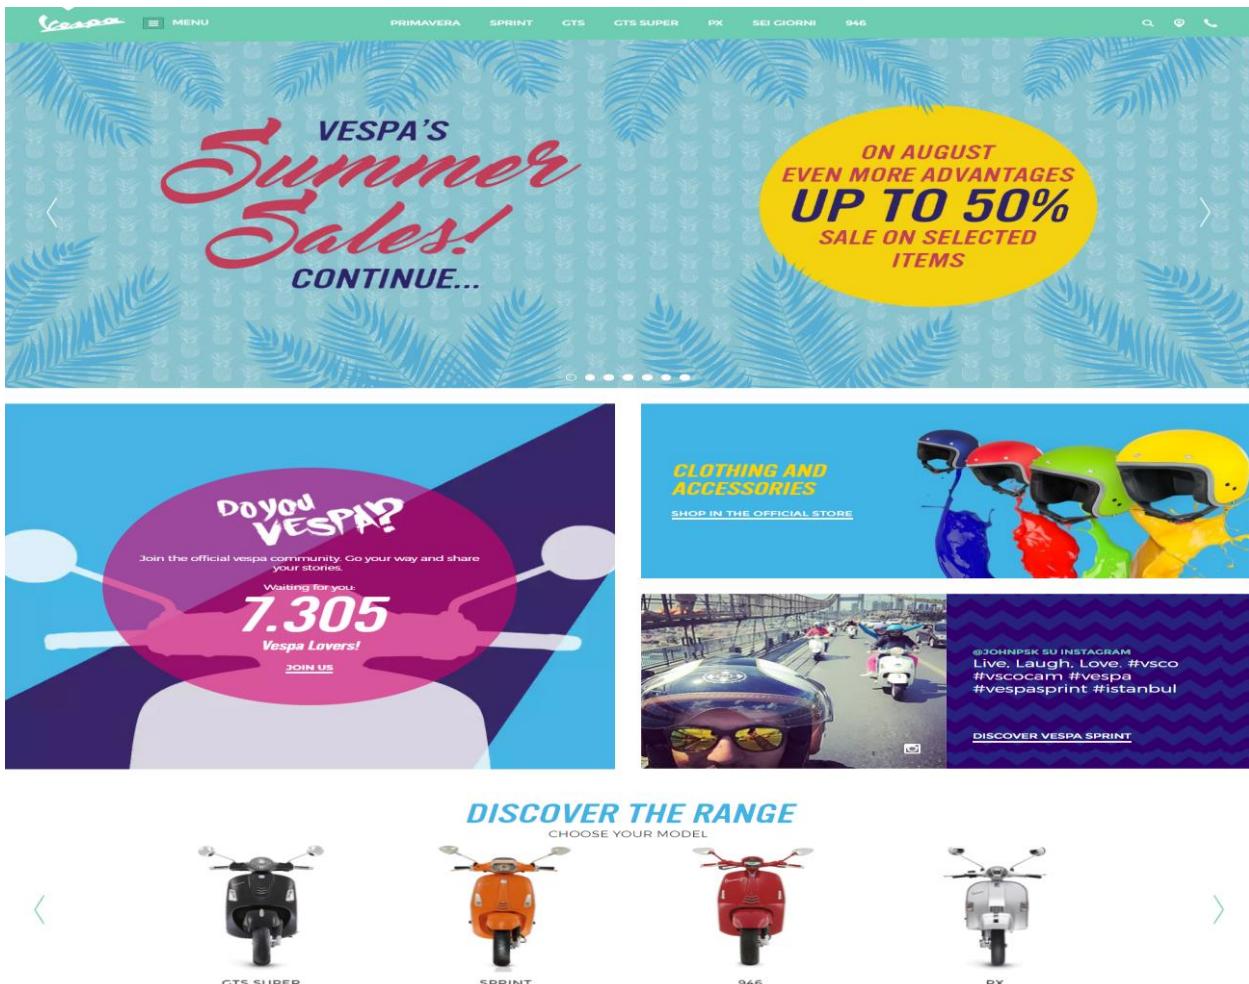

Figure 14: Website of Vespa

URL: http://www.vespa.com/uk_EN

Pros	Cons
Nice Layout and design. Offers model of scooters and their price. Nice features and color used. Search features so that user can access more model easily. Scooters are described with proper model, price and other description.	Little bit complex to go through the page. No feedback form for users. No latest news for new models of scooter. Not full view of scooters.

Table 7: Pros and Cons of Vespa Website

3.2.3. Website of HTC

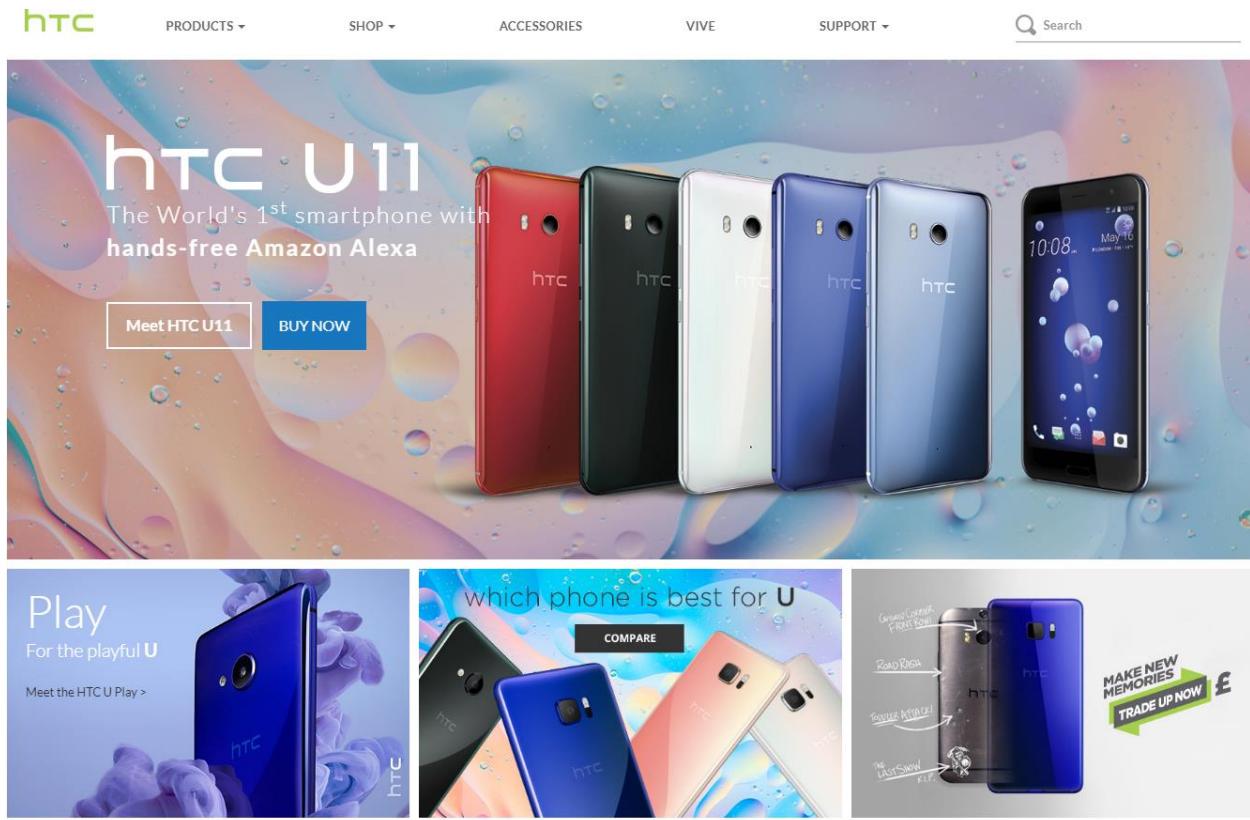

Figure 15: Website of HTC

URL: <http://www.htc.com/uk/>

Pros	Cons
Design is user friendly. Easily can access to any pages. Products are properly maintained with their description and price. Videos are available to surf more about company and products. Shop page to get details about products. Video tutorials to get idea to use products.	Not a deep information about company and products. Not more products on sale. No discounts given. No options for online shopping. No form for feedback. No option for sign in to social sites.

Table 8: Pros and Cons of HTC Website

3.2.4. Website of Clothes Nepal

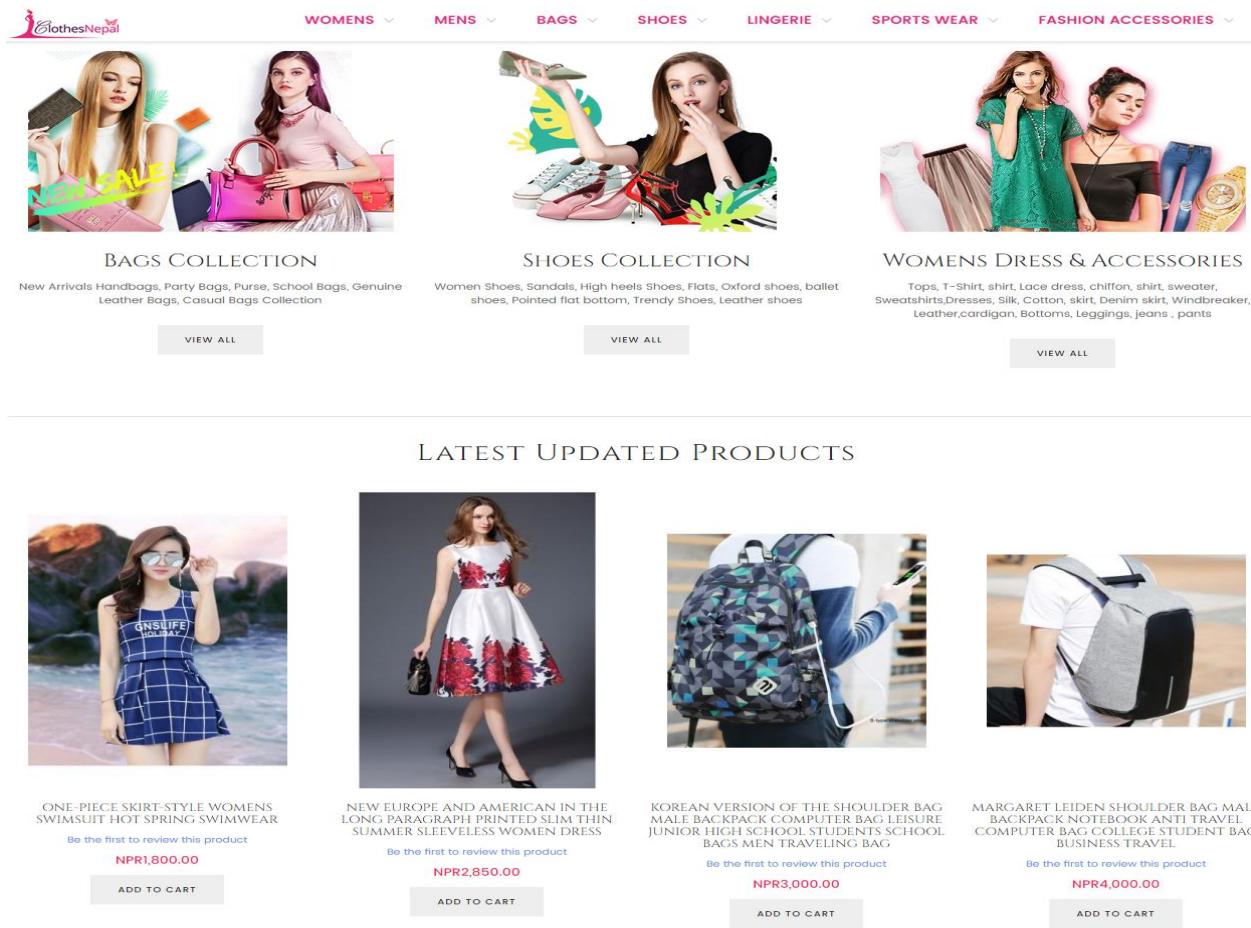

Figure 16: Website of Clothes Nepal

URL: <https://www.clothesnepal.com/>

Pros	Cons
Nice graphic design and layout. User friendly contents. Clearly visible details and information. Collections are categorized with detailed information. Navigation bar is based on categories of products. Online shopping is available. Latest updated contents are available.	Only girlish colors are used. Light color are used on details of product which is not clearly visible. Same products are repeated several times on sale. Not matching color combination.

Table 9: Pros and Cons of Clothes Nepal Website

3.2.5. Website of Worldlink

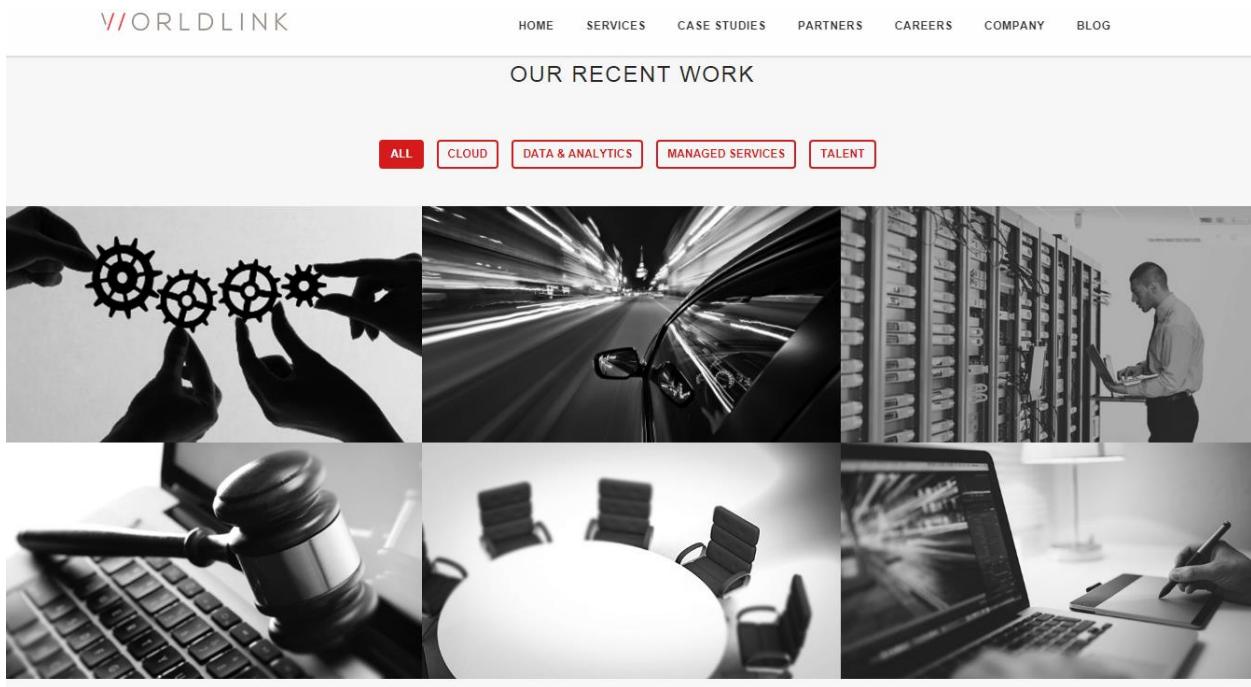

Figure 17: Website of Worldlink

URL: <http://www.worldlink-us.com/>

Pros	Cons
Nice color combination and clear design. Navigation bar is simple and clearly visible. Nice features for user. User friendly. Has deep and clear information about company. Pictures are arranged properly.	Margin is not properly managed. Space between sections are useless. Red color on hover on pictures are bit weird. Many pictures without proper description.

Table 10: Pros and Cons of Worldlink Website

4. Website Management

As I have to make a commercial website of any organization for this assignment. Website requirements were the first step to my project. I thought to make a website about Museum of London whose title is London Museum of Art and Photography. According to requirements, I made a plan and started to make wireframes for webpages. I did a research about html, css and javascript and finally started html coding for webpages. I made webpages which comprised with 6 pages which were Home, Art, Photography, Events, Exhibition and Feedback. I used css to control the color of the text, the style of fonts, the spacing between paragraphs, background images, colors used, layout designs and as well as a variety of other effects. I created tables, inserted images and used javascript to check or modify the contents of forms and to make a slideshow of images. I used image mapping in different places and inserted logo also. In this way I completed my website and started writing a report.

5. Conclusion

From this assignment, I learned a lot of things which will help me a lot in future. The main thing is that, I learned html, css and javascript properly and made a website by using html, css and javascript. At first I was bit nervous about this project that how to finish it. Many confusions were running on my mind. I thought it will be very difficult to complete it. The topics were totally new for me. But, later on all the lectures, tutorials, lab classes helped me a lot to learn all the topics. It made me clear about all the topics and I got many ideas about this project. I started my work fluently. I learned other many things by researching on internet. I collected lot of ideas and finished the project.

This project developed my skills and made my mind broad which will help me in future. Creative mind is being very important thing nowadays in the world of business and education. I faced a lot of problems and difficulties from commencing to finishing this assignment. But much support from module leader helped me a lot. I learned the concept of html, css and javascript due to this assignment. These all concepts will help in future which I have learned during this assignment. I came to know about wireframes, image mapping and concept of designing. Hope these things will remain in my mind and make me productive. I believe these topics will prove to be beneficial in future and choosing career paths.

7.1.6. Feedback Page

The screenshot shows the feedback form page of the London Museum of Art & Photography website. The header features the museum's logo and navigation links for Art, Photography, Events, Exhibitions, and a prominent green 'Feedback' button. The main content area is titled 'Feedback Form' and contains fields for First Name, Last Name, Email, Gender (Male/Female), and a large text area for a message. Below the message area is a 'Send' button. The footer includes a map of the museum's location, contact information (421 Ridout Street North, London, Ontario N8A 9H5, 529-691-0355), operating hours (Sun-wed 10AM-5PM, Thurs & Fri 10AM-4PM, Sat 7AM-7PM), social media links (Facebook, Twitter, Instagram), and links to Tickets, Membership, Press, Employment, Privacy Policy, Terms & Conditions, Rent Space, and Store. It also thanks funders and credits the Nepal Museum for Art and Pictures.
